

Distributed Generation Statistics

As at 25 May 2009

The Electricity Governance (Connection of Distributed Generation) Regulations 2007 mandate the application and approval process between the prospective generator and the distributor (i.e. the network operator).

One of the specific obligations on distributors is annual reporting of statistics pertaining to connection of distributed generation. The graphs attached to this document are the aggregated result of that reporting from distributors.

Note that since the Electricity Governance (Connection of Distributed Generation) Regulations 2007 came into force on 30 August 2007, that is the timeframe of the statistics presented (i.e. '2007' is in fact only from 30 August 2007 til 31 December 2007).

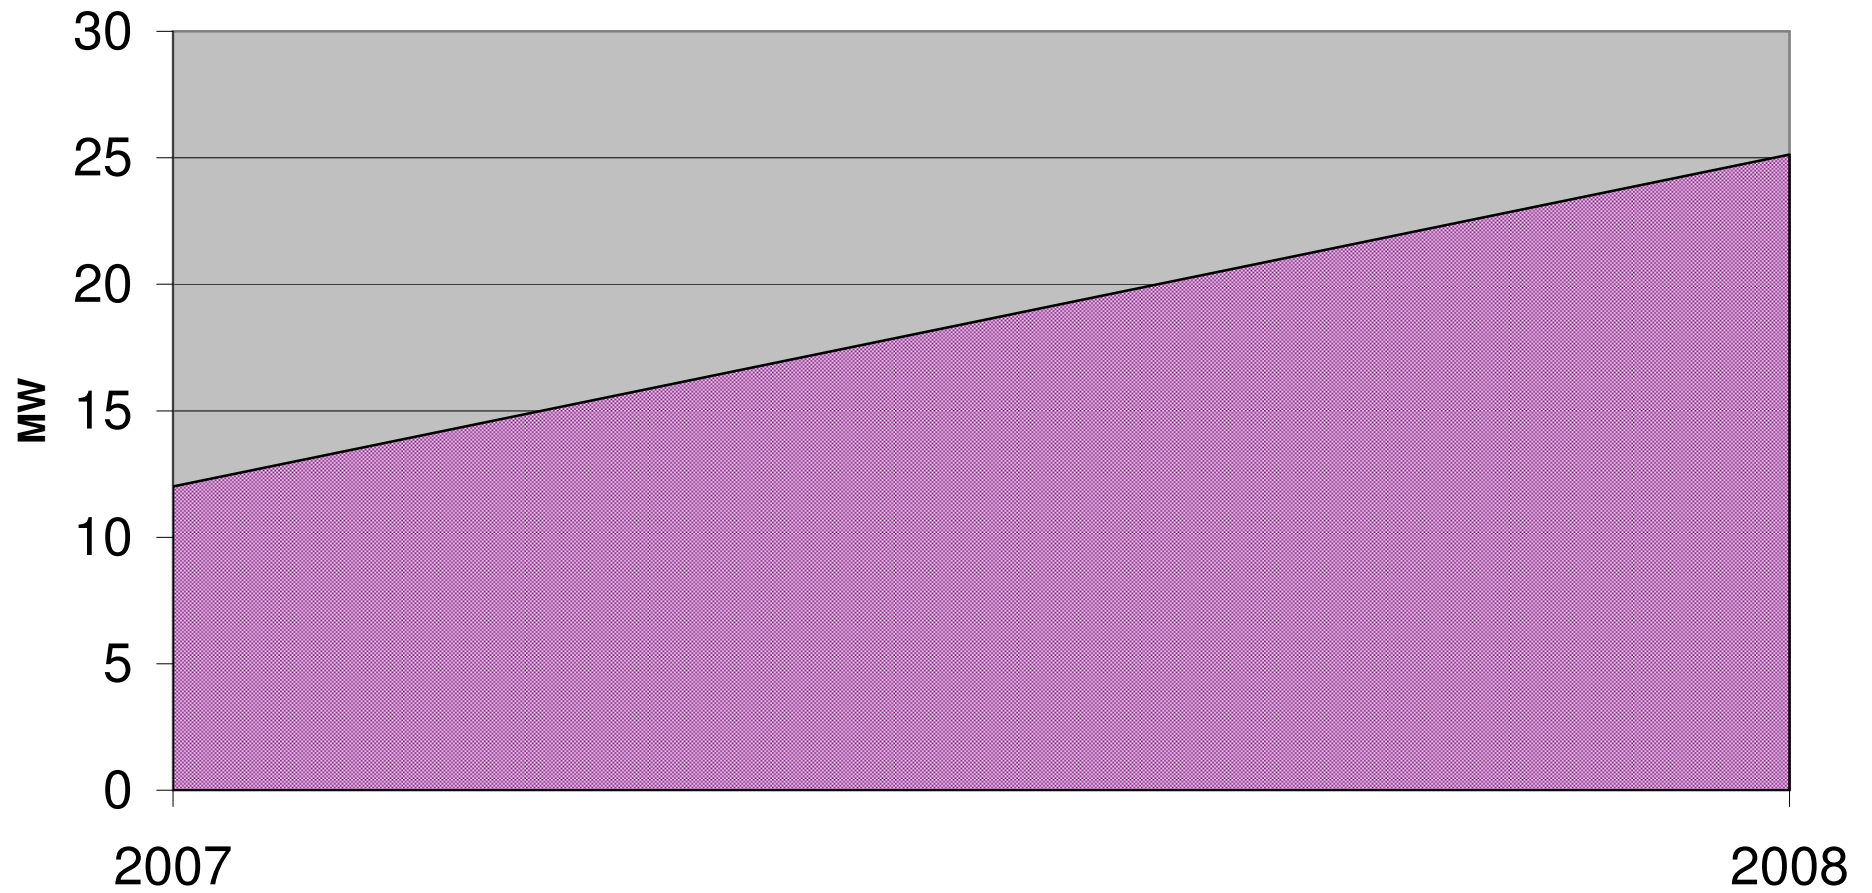

More information concerning distributed generation can be found on the Electricity Commission website at the following URL:

<http://www.electricitycommission.govt.nz/opdev/retail/distributed-generation>

Any further questions on the subject may be directed to
