

# Table of Contents

## **PART A: INTERPRETATION**

1. Defined terms	1
2. General principles of construction	51
3. A special definition of “related”	52
4. A special definition of “independent”	52
5. A special definition of purchaser and payer	52

## **SCHEDULES**

Schedule A1 – Notice of assumption of rights and obligations under part C and part G and part H of the Electricity Governance Rules 2003	54
--	----

Schedule A2 – Revocation of notice of assumption of rights and obligations under part C and part G and par H of the Electricity Governance Rules 2003	56
---	----

## **PART B: [reserved for future use]**

## **PART C: COMMON QUALITY**

### **SECTION I: GENERAL**

1. Contents of part C	1
-----------------------	---

### **SECTION II: THE PRINCIPAL PERFORMANCE OBLIGATIONS OF THE SYSTEM OPERATOR (PPOs)**

1. Contents of section II	2
2. Principal performance obligations of the system operator	2
3. Exceptions for frequency standards	4
4. The system operator may rely on information provided	6
5. Restoration	6
6. System operator may contract for higher levels of common quality	6
7. System operator will not contract contrary to this arrangement	7
8. Purpose of the policy statement	7
9. Initial policy statement	7
10. Draft policy statement	7
11. Process for policy statement review	8
12. Rule changes and variations	9
13. Departure from a policy statement	9
14. Review of performance of the system operator	10

15. System operator to prepare and review system security forecast	10
<b>SECTION III: ASSET OWNER PERFORMANCE OBLIGATIONS (AOPOs) AND TECHNICAL STANDARDS</b>	
1. Contents of section III	11
2. Asset owner performance obligations and technical standards concerning frequency	11
3. Asset owner performance obligations and technical standards concerning voltage	14
4. Other asset owner performance obligations and technical standards	17
5. System operator to monitor compliance	18
6. Responsibility for compliance	19
7. Equivalence arrangements and dispensations	20
8. Liability of asset owner pending decision	22
9. Other provisions relating to equivalence arrangements and dispensations	24
10. Board may require excluded generating stations to comply with certain rules	25
<b>SECTION IV: ARRANGEMENTS CONCERNING ANCILLARY SERVICES</b>	
1. Contents of section IV	26
2. System operator to use reasonable endeavours to implement and comply with procurement plan	26
3. Initial procurement plan	26
4. Process for procuring ancillary services	26
5. Process for procurement plan review	28
6. Contracts with ancillary service agents	29
7. Rule changes and variations	29
8. Departure from procurement plan	30
9. Alternative ancillary service arrangements	30
10. Other provisions relating to alternative ancillary service arrangements	33
11. Allocating ancillary services costs	34
<b>SCHEDULES</b>	
Schedule C1 – Approval of equivalence arrangement or grant of dispensation	43
Schedule C2 – Approval of alternative ancillary service arrangement	47
Schedule C3 – Technical Codes	50
Technical Code A – Assets	50

Technical Code B – Emergencies	74
Technical Code C – Operational Communications	85
Technical Code D – Co-ordination of outages affecting common quality	92
Schedule C4 – Policy statement	81
Schedule C5 – Procurement plan	150
Schedule C6 – Reserve management objective	200
<b>PART D: METERING ARRANGEMENTS</b>	
1. Contents of part D	1
2. Responsibility for metering installations at points of connection on the grid	1
3. Responsibility for quantification at points of connection on local networks or embedded networks	2
4. Electricity recorded will be the record of supply	3
5. Metering installations not always located at point of connection	4
6. Metering installations to comply with codes of practice	4
7. Raw meter data to be archived in accordance with schedule J2	4
8. When metering installations are to be tested	5
9. Requests for metering installation tests	5
10. Who conducts tests	5
11. Adjustment of defective metering installation	5
12. Reconciliation manager will determine inaccuracies	6
13. Participants will notify reconciliation manager of inaccuracies	6
14. Information to be included with reconciliation manager's notice	6
15. Reconciliation manager will distribute further information	7
16. If conflicted, reconciliation manager will appoint an independent person	7
<b>SCHEDULES</b>	
Schedule D1 – The Codes of Practice	8
Code of Practice D1 – Metering Installations	8
Code of Practice D2 – Requirements for approved test houses	10
Code of Practice D3 – Requirements of metering installations	26
Code of Practice D4 – Data logger minimum functional requirements	51
Code of Practice D5 – Variation of requirements	57

## **PART E: REGISTRY INFORMATION AND CUSTOMER SWITCHING**

1. Contents and application of part E	1
2. Certain points of connection must have ICPs	1
3. Distributors must create ICPs	2
4. Retailers may request distributors to create ICPs	2
5. ICP Attributes	2
6. Distributors must provide ICP information to the registry	3
7. Distributors must keep information up to date	3
8. Updating NSP information	3
9. Distributors	4
10. Distributors' processes to be audited	4
11. Retailers must provide ICP information to the registry	5
12. Retailers must keep information up to date	5
13. Process to update changes to unmetered load	5
14. Process for maintaining shared unmetered load	6
15. The process for customer switching	6
16. Parties to ensure arrangements for line function services	6
17. Energisation of ICPs	7
18. Retailer responsibility for an ICP	7
19. Process for resolving registry discrepancies	7
20. Information to be provided in format specified by the Board	8
21. Registry must be open between 0730 and 1930 each day	8
22. Confirmation of receipt of data	8
23. Reports from the registry	8
24. Registry reports to specific participants	9
25. Access to the registry	11
26. Registry notifications	11
27. Use of ICP identifier on invoices	11
28. Customer queries	11

29. Database of record	11
<b>SCHEDULES</b>	
Schedule E1 – Creation and management of ICPs and NSPs	12
Schedule E2 – Switching	22
<b>PART F: TRANSPORT</b>	
<b>SECTION I: GENERAL</b>	
1. Contents of part F	1
2. Discretion to waive rule requirements	1
3. Interaction between Part C and Part F	1
<b>SECTION II: TRANSMISSION AGREEMENTS</b>	
1. Contents of section II	3
2. Structure of transmission agreements and participants required to enter into transmission agreements	3
3. Transmission agreements	5
4. Benchmark agreements for connection to and/or use of the grid	20
5. Variations from benchmark agreements and grid reliability standards and enhancement and removal of connection assets	22
6. Resolutions of disputes	30
7. Review of benchmark agreements	31
8. Existing agreements not affected	32
<b>SCHEDULES</b>	
Schedule F1 Categories of Designated Transmission Customers	28
Schedule F2 Benchmark Agreement	30
Schedule F2A Benchmark Agreement clauses to apply following transitional period	150
<b>SECTION III: GRID UPGRADE AND INVESTMENTS</b>	
1. Contents of section III	161
2. Purpose of the grid upgrade and investment rules	161
3. Obligations to provide information	162
4. Grid reliability standards	162
5. Review of grid reliability standards	164
5A. Core grid determination	164
5B. Review of core grid determination	166

6. Grid investment test	167
7. Review of grid investment test	168
8. Investment contracts	169
9. Statements of opportunities	169
10. Grid Planning Assumptions	171
11. Centralised data set	172
12. Grid upgrade plans	173
12A. Grid reliability reporting	174
13. Approval of reliability investments	175
14. Approval of economic investments	177
15. Publishing of grid upgrade plans and approvals	178
16. Transitional provisions	179
17. Consequence of approval of grid investment or expenditure	180
<b>SCHEDULES</b>	
Schedule F3 Grid Reliability Standards	182
Schedule F3A Core Grid Determination	184
Schedule F4 Grid Investment Test	187
<b>SECTION IV: TRANSMISSION PRICING METHODOLOGY</b>	
1. Purpose for establishing transmission pricing methodology	196
2. Pricing principles	196
3. Application and interpretation of pricing principles	196
4. Board must prepare an issues paper	196
5. Board must consult on issues paper	197
6. Board must publish process for development of transmission pricing methodology	197
7. Development of transmission pricing methodology by Transpower	197
8. Process for Board determination of transmission pricing methodology	198
9. Transpower to apply approved transmission pricing methodology	199
10. Enforcement of transmission charges	201
11. Review of an approved transmission price methodology	201
<b>SCHEDULE</b>	
Schedule F5 Transmission Pricing Methodology	202

## **SECTION V: FINANCIAL TRANSMISSION RIGHTS**

1. Contents of section V	239
2. Design	239
3. Report on progress	239

## **SECTION VI: Interconnection asset services**

1. Purpose of this section	242
2. Transpower to identify interconnection branches, and propose service measures and levels	242
3. Transpower to make interconnection branches and other assets available and keep grid configuration	245
4. Exceptions to rule 3	246
5. Transpower to maintain interconnection assets	247
6. Transpower to propose reliability investments and economic investments	247
7. Information on capacities of individual interconnection assets	249
8. Permanent removal of interconnection assets from service	249
9. Transpower to provide and publish annual report on interconnection asset capacity and grid configuration	249
9A. Transitional requirements for reporting on availability and reliability	252
10. Reporting on availability and reliability	253
11. Transpower and designated transmission customers may agree on other requirements	256

## **SCHEDULE**

Schedule F6	252
Date for summer and winter periods	252
Configuration and capacity of HVDC link	253
HVDC Filter requirements	255
Service measures and levels for HVDC shunt assets	256
Service measures and levels for shunt assets	258
North Island Power Station	662
South Island Power Station	666
Regional Single Line Diagram Information Sheet	667

## **Section VII Preparation of Outage Protocol**

1. Purpose of this section	721
2. Definition of outage	721

3. Principles for developing Outage Protocol	721
4. Required content of Outage Protocol	722
5. Required content of Outage Protocol in respect of planning for outages	723
6. Required content of Outage Protocol in relation to unplanned outages	731
7. Reporting on compliance with Outage Protocol	731
8. Transpower to submit proposed Outage Protocol	732
9. Board may initially approve the proposed Outage Protocol or refer back to Transpower	732
10. Reconsideration of revised Outage Protocol by the Board	732
11. Board must consult on the proposed Outage Protocol	733
12. Board may undertake additional consultation	733
13. Board to make recommendations to Minister	733
14. Review of Outage Protocol	733
15. Compliance with Outage Protocol	733

**SCHEDULE**

Schedule F7 Outage Protocol	734
-----------------------------	-----

**PART G: TRADING ARRANGEMENTS**

**SECTION I: GENERAL**

1. Contents of part G	1
2. Relevant information	1
3. Approval process for industrial co-generating stations	2

**SECTION II: BIDS AND OFFERS**

1. Contents of section II	3
2. Bids and offers will be lawful	3
3. Bids and offer preparation	3
4. Special treatment of some grid exit points	13
5. Information from grid owners	14
6. Offering instantaneous reserve	17
7. Availability of final bids and final offers	24

**SECTION III: SCHEDULING AND DISPATCH**

1. Contents of section III	26
2. The dispatch objective	26

3. Process for preparing a pre-dispatch schedule	26
4. The dispatch process	32
5. Rules governing the preparation of a schedule of dispatch prices, dispatch quantities, dispatch arc flows, dispatch group constraint arc flows, group constraint formulas and HVDC component flows	40
6. Preparation of real time prices	41
7. Publication of real time prices	42
8. Grid emergency situations	45
9. Reporting obligations of the system operator	49
10. System operator to publish information	50
<b>SECTION IV: MUST-RUN DISPATCH AUCTION</b>	
1. Contents of section IV	54
2. Clearing manager to hold must-run dispatch auctions	54
3. Must-run auction process	56
<b>SECTION V: PRICING</b>	
1. Contents of section V	59
2. Purpose of the pricing process	59
2A. Trigger ratio for high spring washer price situation	59
2B. Methodology to resolve high spring washer price situation	59
3. Rules governing the preparation of provisional and final prices	60
4. Rules governing the calculation of constrained off amounts	81
5. Rules governing the calculation of constrained on amounts	86
6. Rules governing payment of constrained on compensation	92
7. Reporting obligations of the pricing manager	93
<b>SECTION VI: HEDGE ARRANGEMENT DISCLOSURE RULES</b>	
1. Contents of section VI	96
2. Parties required to submit information	96
3. Information that must be submitted	96
4. Calculation of contract price	98
5. Node and grid zone area information	99
6. Other information that must be submitted	99
7. Modified or amended information	100
8. Correction of information	100

9. Timeframes for submitting the information	100
10. Information system will make the information publicly available	101
11. Verification of the information	101
12. Confirmation of information submitted to the information system	103
13. Submitting party to check if no confirmation received	103
14. Certification of information	103
15. Audit of information	103
16. Payment of costs relating to audits	104
17. Information system and Board must not publish certain information and may use information only under this section	104
18. No misleading information	105
19. Risk management contracts must be lawful	105
20. Availability of information	105
<b>SCHEDULES</b>	
Schedule G1 – Forms 1 to 6	106
Schedule G2 – Model parameters	115
Schedule G3 – Diagram of the pricing process <i>[revoked]</i>	116
Schedule G4 – Reconciliation sequence <i>[revoked]</i>	117
Schedule G5 – Calculation of electricity supplied to incumbent retailers <i>[revoked]</i>	118
Schedule G6 – Schedule of prices and quantities	119
Schedule G7 – Retailer reconciliation process <i>[revoked]</i>	133
Schedule G8 – Codes of practice <i>[revoked]</i>	134
Schedule G9 – Approval of industrial co-generating stations	135
<b>PART H: CLEARING AND SETTLEMENT</b>	
1. Contents of part H	1
2. Form of prudential requirements	1
3. Level of security	8
4. Information, monitoring and reporting	10
5. Disputes regarding prudential requirements	13
6. Formation of contracts for the sale and purchase of electricity	14
7. Invoices to and payments by payers	15
8. Payments to and from payees	19
9. Default	26

10. Disputed invoices	30
11. Washups	32
12. Payment of loss and constraint excess	36
13. Reporting obligations of the clearing manager	36
14. Special rules applying to the clearing manager	40
15. Notices	40

## **SCHEDULES**

Schedule H1 – Guarantee	41
Schedule H2 – Letter of credit	43
Schedule H3 – Deed of guarantee and indemnity	46
Schedule H4 – Surety bond	52
Schedule H5 – Hedge settlement agreement	54

## **PART I: TRANSITION**

### **SECTION I: GENERAL**

1. Contents of part I	1
-----------------------	---

### **SECTION II: INTERIM DISPENSATIONS AND EXISTING COMMON QUALITY AGREEMENTS**

1. Interim dispensations	2
2. Existing contracts for higher levels of common quality	3

### **SECTION III: TRANSITION FROM MARIA**

1. Approval of MARIA test houses	5
2. Approval of MARIA data administrators	5
3. Variations granted under MARIA code of practice 6	5
4. Approval of MARIA profiles	5
5. Interim certifications granted under MARIA code of practice 3	5
6. Certifications granted under MARIA code of practice 3	5

### **SECTION IV: TRANSITION FROM NZEM**

1. Combined security	6
2. Grid owner related payments or invoices from the clearing manager under the NZEM Rules	7
3. Grid exit points approved under NZEM	8
4. Block and station dispatch	8

### **SECTION V: EXISTING ANCILLARY SERVICE ARRANGEMENTS**

1. Existing ancillary service arrangements	10
2. Transitional ancillary service arrangements	10
3. Term over which these rules will have effect	10

**SCHEDULES**

Schedule I1 – Guarantee for combined security	11
Schedule I2 – Letter of credit for combined security	14

**PART J: Reconciliation**

1. Preliminary	1
2. Relevant information	1
3. Provision of trading information at a point of connection to a network	2
4. Provision of information to the reconciliation manager	4
5. Notification of changes to the grid	7
6. Notification of outage constraints	7
7. Reconciliation manager may request additional information	9
8. Seasonal adjustment and profiling	9
9. Calculation and allocation of unaccounted for electricity	10
10. Reconciliation information produced by reconciliation manager	10
11. Revisions	12
12. Information disputes	17
13. Reporting obligations of the reconciliation manager	19
14. The Board to publish reports	20
15. Use of agents by reconciliation participants	20
16. Provision of information	20
17. NZDT adjustment techniques	20
18. Audits	21
19. Functions requiring certification	22
20. Reconciliation participants must use participant identifiers	23

**SCHEDULES**

Schedule J1: Audit and Certification Processes	24
Schedule J2 Collection of volume information	32
Schedule J3: Calculation and provision of submission information	44
Schedule J4: Reconciliation procedures	50
