

We would just like to again register our opposition to the proposed powerline scheme. We do not consider it by any means the most sensible scheme, We continue to oppose it for the same reasons we have provided before and we support underground in Manukau. Having observed the treatment of Mr Hemmingway, our faith in the ability of the electricity commission to Impartially be able to make the best decision, has been considerably less. I hope the best decision for New Zealands future can still be made ,and we still believe it is not the one presently advocated by Transpower.

Yours faithfully

Jill and Marinus Bolscher
