Dear Maree

Consultation Paper: Disconnected Nodes

Thank you for the opportunity for Meridian Energy Ltd to make submissions on the Electricity commission's consultation paper *Disconnected Nodes*.

Meridian supports the rule changes

Meridian supports the Commission's proposed changes to parts A and G of the Electricity Governance Rules 2003, and the consequential amendments to part H and J.

We agree it is important that the rules do not create a barrier to the development of the Market systems Project. We also agree that the effect of the rule changes is minor, and that they do not have any adverse effect.

Yours faithfully,

Anthony white
